

# STORAGE CAN BE CHILD'S PLAY.

## NURSERY

The 'A user's guide to Contiboard' leaflet will help you achieve a professional finish. Filled with tips and hints on how to work with Contiboard we recommend this is read before starting your project. All drilling that goes through the board should be started from the visible side.

The bottom, middle and top fixed panels are made from pine finish Contiboard and the adjustable shelf is made from white Contiboard with pine edging.

1. Fix one end panel and the back together with the appropriate screws, now fix the second end panel to the back.
2. Position the base panel between the ends and fix with the appropriate screws (when fixing the base panel to the end panels a gap of 10mm needs to be left - see drawing A).
3. Now fit the top and middle shelves using the appropriate screws.
4. Drilling for the hinges on both the door and the unit are dependent on the type of hinge purchased. There are a large selection of hinges and handles available at your local DIY store.
5. White screw cover caps can be purchased to create a smooth and seamless finish. Screw cap covers can easily choke a child - glue these into place for extra safety.

### Finishing touches

6. Accessorise with baskets and a changing mat to match your baby's room.

**Boards required:** 7 x 2000 x 225mm, 5 x 2000 x 450mm, 4 x 1000 x 450mm, 36 x 50mm chipboard screws, 34 x 25mm chipboard screws

**CUTTING AND DRILLING PLANS**  
continued...

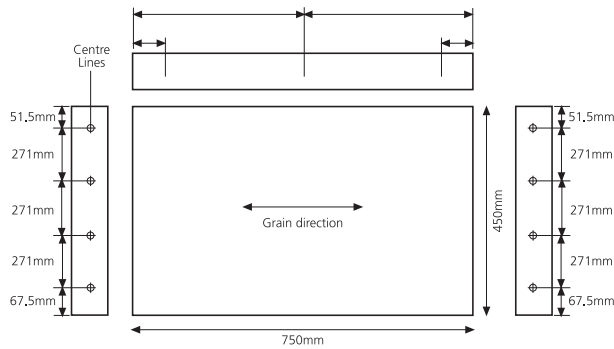

# CUTTING AND DRILLING PLANS

Finished size of baby changer when using supplied plans – Height 950mm, Width 780mm, Depth 450mm. Adapt to suit individual requirements. This unit needs to be made on its back. Some help will be needed to move the finished unit into position. To convert mm to inches divide the metric measurement in millimetres by 25.4.

## Top - Middle - Base

Made from pine finish Contiboard and edged on front face with matching Contiboard edging strip.

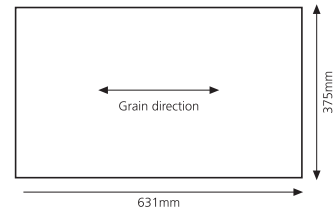

Drill 11x 3mm diameter holes to a depth of 20mm in the edges of 3 sides.

## Doors x2

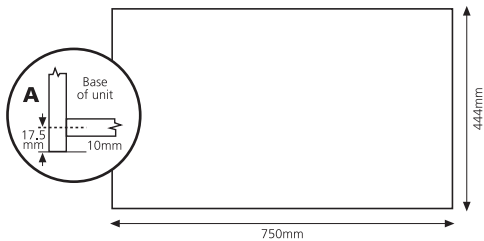

Made from pine finish Contiboard and edged all round with matching Contiboard edging strip.

Drilling for hinges will be dependent on the type purchased.

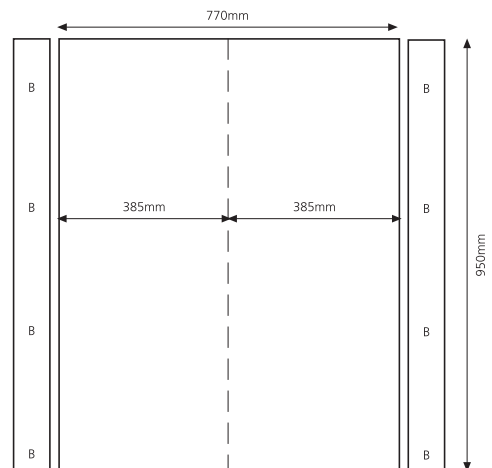

## Shelf

One shelf required made from white finish Contiboard and edged on both long edges with pine Contiboard edging strip.

## Back Panel x1

Made from 3mm back panel.

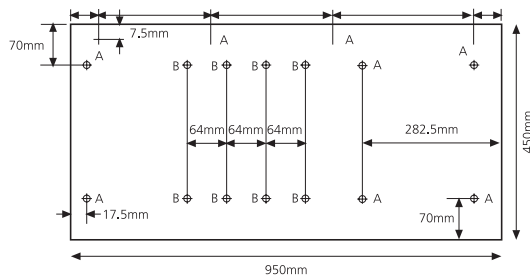

## End Panels x2

Made in white finish Contiboard with pine Contiboard strip edging on two long edges.

Drill 10 holes using a 5mm diameter drill bit through the panel (A).

Drill 8 holes using a 5mm diameter drill bit to a depth of 12mm.

# THE VERSATILE CONTIBOARD RANGE

## A FINISH FOR EVERY SITUATION

Whether you live in a modern or traditional home, storage units can make or break a room. That's why we've designed a range of boards with a high-spec melamine finish that can be made to not only fit the shape of your home, but also the style. And because interior design is constantly changing, we're always developing and broadening our range of different coloured and printed designs. **All you need to do is add imagination.**

### TOOLS REQUIRED

- Square, measuring tape and pencil
- Electric power saw with correct blade or hand saw (14 teeth per 25mm)
- Screwdrivers, screws, sharp marking/trimming knife
- Electric iron, glasspaper and block
- Drill with drill bits suitable for wood  
– Drill with 3mm and 5mm drill bits

### SIZES AVAILABLE

Finish	White Melamine		Finish effects*
	15mm	15mm	
<b>Thickness</b>			<b>18mm</b>
<b>Sizes</b>	152 x 1830mm 229 x 1830mm 305 x 1830mm 381 x 1830mm 533 x 1830mm 610 x 1830mm	152 x 2440mm 229 x 2440mm 305 x 2440mm 381 x 2440mm 533 x 2440mm 610 x 2440mm 762 x 2440mm 1220 x 2440mm	150 x 2000mm 250 x 2000mm 325 x 2000mm 450 x 2000mm 600 x 2000mm

#### \*Finish effects include:

Cherry Modern Effect; Rift Beech Effect; Traditional Oak Effect; Cream Effect; Walnut Effect; Chocolate Oak Effect; Maple Effect and Oak Effect.

The manufacturer reserves the right to withdraw or alter the range or part of the range. Matching ContiStrip iron on edging is available to finish sawn edges.

#### Caution and Safety

- Care should be taken when working with all timber products and the correct protective equipment used.
- Do not overtighten fixing screws.
- Ensure that you have sufficient working space to construct the unit.
- Heavy units are difficult to move and may require help from an additional person.
- Keep all tools and fixing items out of reach of children to prevent accidents occurring.
- Screw cap covers can easily choke a child. Glue these into place for extra safety.
- Check for wires and pipes with a special battery-powered detector before drilling.
- Always restrain freestanding units if there is a possibility of children climbing on them.
- Cleaning melamine or foil faced particleboard. Use mild soap and water only on a slightly damp cloth. Do not use abrasive or solvent cleaners.

ContiBoard has been offering an alternative to ill-fitting, mass-produced, flat-packed furniture for over 25 years. The versatile nature and wide range of appealing finishes of our boards means that during that time they have been made into wardrobes, cupboards, shelving, storage boxes, tables... whatever you could think of really: Some weird, all wonderful.

**We look forward to seeing what ideas you come up with in the next 25 years.**
